VISAKHAPATNAM

Chairman and Managing Director

2016 NEW YEAR GREETINGS TO EMPLOYEES

My Dear Friends,

Greetings to you and your family members for the New Year.

The year 2016 will be a challenging year for all of us. So far as the projects are concerned, DCI has been awarded the work of capital dredging at Marmugoa Project to be commenced from the beginning day of the year. Continue the maintenance dredging work at Cochin Port, Kolkata Port and Visakhapatnam Port Trust, SNC Cochin and CSL Cochin are going on and likely to commence dredging shortly at Chennai Port. Other challenging dredging projects also expected to come up this year.

As all of you know, though the dredging works in the country have increased considerably because of the large expansion of existing ports and creation of new ports, at the same time competition has become intense in securing the contracts as large number of domestic and foreign players are vying for the same. In order to complete works in hand in time by DCI, it becomes our bounden duty to ensure that the dredging works are carried out efficiently and in time bound manner. To achieve the same, improvement of communication between Head Office, Project Office and floating staff is extremely essential. Along with this reorganization of staff, outsourcing of activities and diversification of activities has been planned and implemented. Let us all work together to make the year 2016 a memorable one.

Rajesh Tripathi

Chairman and Managing Director
