

DREDGING CORPORATION OF INDIA LTD VISAKHAPATNAM

DCI has capacity to cater to 60 - 70% of Maintenance and Capital Dredging requirements of the Country says DCIL,MD

4TH September 2019

Dredging Corporation of India Limited has capacity to meet the lion's share of India's maintenance and capital dredging market says DCIL, Managing Director, Shri Rajesh Tripathi. Addressing the delegates of the Tenth Annual Conference on "Dredging In India", at Mumbai, MD, DCIL showcased the experience and technological prowess of the dredging major from Visakhapatnam in maintenance and capital dredging, beach nourishment, land reclamation and project management consultancy. He said that after the takeover of DCIL by a consortium of four ports, it is eyeing now on geographical expansion along with diversification into Shallow Water Dredging, Marine Construction, Sand Mining, Dredging Aggregates, Marine Consultancy. With the Centre's recent impetus to Inland Waterways Development, Sagarmala Project, Coastal Development, upcoming green field ports and consideration of new section of Indian rivers under the Indo-Bangladesh Protocol, DCIL is poised for a higher growth trajectory he said. Shri Tripathi informed the delegates that DCIL is unique in its repertoire of specialist knowledge in environment friendly dredging techniques and can substantially meet the emerging dredging needs of the country on a sustainable basis. The annual conference on "Dredging In India" is being held at Mumbai from 4th to 5th of September to deliberate on the emerging trends and opportunities and discuss key challenges in the dredging sector in the country.
