SCOPE OF WORK

Dredging Corporation of India Ltd., (a Govt. of India Undertaking), having its Head Office at Visakhapatnam and one of its Project Offices situated at Township, Haldia is an ISO 2009-2015 and ISO 14001:2015 certified COMPANY. DCI Trailer Suction Hopper Dredgers are mostly deployed for dredging at Jellingham, Haldia Anchorage, Eden & Auckland Bar for dredging. Garbage of different types as mentioned below, that are being accumulated are to be collected from the Dredgers and same are to be landed ashore for disposal as per rules applicable within the locality/ area of operation. The Corporation is desirous to have contract for the collection and removal of Garbage from its Dredgers and Crafts deployed at Haldia with experienced and competent firms who are interested in carrying out the work.

The type of Garbage to be collected from Dredgers are as given below:

Sl. No.	Garbage Type	Storage Bin colour	Disposal area as per EMS Procedure ISO(14001-2015)
i	Food waste	Blue	More than 12 miles from the nearest land or MARPOL regulation of Annex-V is fulfilled or Haldia Municipal Corporation specified garbage dispose area.
ii	Paper, Rags and similar refuse	Black	More than 12 miles from the nearest land or MARPOL regulation 3 of Annex-V is fulfilled or Haldia Municipal Corporation specified garbage dispose area.
iii	Glass, Metal, Bottles, Crockery.	Red	Disposal into sea prohibited, to be landed ashore or Haldia Municipal Corporation specified garbage dispose area.
iv	Floating dunnage, Lining and Packing materials.	Yellow	More than 12 miles from the nearest land or MARPOL regulation 3 of Annex-V is fulfilled or Haldia Municipal Corporation specified garbage dispose area.
v	Plastic-including Synthetic ropes, fishing nets and plastic garbage bags.	Red	Disposal into sea prohibited, to be landed ashore or Haldia Municipal Corporation specified garbage dispose area.
vi	Oil soaked rags and Garbage	Red	Disposal into sea prohibited, to be landed ashore or Haldia Municipal Corporation specified garbage dispose area.

Note: MARPOL regulation 3 of Annex-V is attached with the tender.

The Garbage is to be collected from DCI Dredgers at stream (dredging area) or from Jetty (either at Approach Jetty or inside Berth) on as is where basis. Normally, the garbage is to be collected two times in a month (or as per instruction received from Project in charge or nominated person of project office) from each Dredger, unless and otherwise, a separate communication is given by Master/ Project Office to the contractor. For collection of garbage from Dredgers at stream, the contractor can avail the service of DCI routine launch, at free of cost, as per the timings scheduled from time to time and no separate / special boat-trip will be provided by the Corporation for garbage collection. The routine boat/ launch timings can be ascertained from Project Office for the morning trip in the evening of preceding day.

Signature of Tenderer with seal

Annex V- Regulations for the Prevention of Pollution by Garbage from Ships

Appendix to Annex V - Form of Garbage Record Book

Name of ship: _____

Distinctive number or letters: _____

IMO No.: _____

Period: _____ From: _____ To: _____

1 Introduction

In accordance with regulation 9 of Annex V of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 (MARPOL 73/78), a record is to be kept of each discharge operation or completed incineration. This includes discharges at sea, to reception facilities, or to other ships.

2 Garbage and garbage management

Garbage includes all kinds of food, domestic and operational waste excluding fresh fish and parts thereof, generated during the normal operation of the vessel and liable to be disposed of continuously or periodically except those substances which are defined or listed in other annexes to MARPOL 73/78 (such as oil, sewage or noxious liquid substances).

The Guidelines for the Implementation of Annex V of MARPOL 73/78* should also be referred to for relevant information.

3 Description of the garbage

The garbage is to be grouped into categories for the purposes of this record book as follows:

- 1 Plastics
- 2 Floating dunnage, lining, or packing material
- 3 Ground-down paper products, rags, glass, metal, bottles, crockery, etc.
- 4 Cargo residues, paper products, rags, glass, metal, bottles, crockery, etc.
- 5 Food waste
- 6 Incinerator ash.

4 Entries in the Garbage Record Book

4.1 Entries in the Garbage Record Book shall be made on each of the following occasions:

- (a) When garbage is discharged into the sea:
 - (i) Date and time of discharge
 - (ii) Position of the ship (latitude and longitude). Note: for cargo residue discharges, include discharge start and stop positions.
 - (iii) Category of garbage discharged
 - (iv) Estimated amount discharged for each category in cubic metres
 - (v) Signature of the officer in charge of the operation.
- (b) When garbage is discharged to reception facilities ashore or to other ships:
 - (i) Date and time of discharge
 - (ii) Port or facility, or name of ship
 - (iii) Category of garbage discharged
 - (iv) Estimated amount discharged for each category in cubic metres

Signature of Tenderer with seal

- (v) Signature of officer in charge of the operation.
- (c) When garbage is incinerated:
 - (i) Date and time of start and stop of incineration
 - (ii) Position of the ship (latitude and longitude)
 - (iii) Estimated amount incinerated in cubic metres
 - (iv) Signature of the officer in charge of the operation.
- (d) Accidental or other exceptional discharges of garbage
 - (i) Time of occurrence
 - (ii) Port or position of the ship at time of occurrence
 - (iii) Estimated amount and category of garbage
 - (iv) Circumstances of disposal, escape or loss, the reason therefor and general remarks.

4.2 Receipts

The master should obtain from the operator of port reception facilities, or from the master of the ship receiving the garbage, a receipt or certificate specifying the estimated amount of garbage transferred. The receipts or certificates must be kept on board the ship with the Garbage Record Book for two years.

4.3 Amount of garbage

The amount of garbage on board should be estimated in cubic metres, if possible separately according to category. The Garbage Record Book contains many references to estimated amount of garbage. It is recognized that the accuracy of estimating amounts of garbage is left to interpretation. Volume estimates will differ before and after processing. Some processing procedures may not allow for a usable estimate of volume, e.g. the continuous processing of food waste. Such factors should be taken into consideration when making and interpreting entries made in a record.

RECORD OF GARBAGE DISCHARGES

Ship's name: _____

Distinctive No., or letters: _____

IMO No.: _____

Garbage categories:

- .1 Plastic.
- .2 Floating dunnage, lining, or packing materials.
- .3 Ground paper products, rags, glass, metal, bottles, crockery, etc.
- .4 Cargo residues, paper products, rags, glass, metal, bottles, crockery, etc.
- .5 Food waste.
- .6 Incinerator ash except from plastic products which may contain toxic or heavy metal residues.

NOTE: THE DISCHARGE OF ANY GARBAGE OTHER THAN FOOD WASTE IS PROHIBITED IN SPECIAL AREAS. ONLY GARBAGE DISCHARGED INTO THE SEA MUST BE CATEGORIZED. GARBAGE OTHER THAN CATEGORY 1 DISCHARGED TO RECEPTION FACILITIES NEED ONLY BE LISTED AS A TOTAL ESTIMATED AMOUNT. DISCHARGES OF CARGO RESIDUES REQUIRE START AND STOP POSITIONS TO BE RECORDED.

Date/time	Position of the ship	Estimated amount discharged into sea (m ³)	Estimated amount discharged to reception facilities or to other ship (m ³)	Estimated amount incinerated (m ³)	Certification/Signature
